West Bengal, India Portfolio

Dear Hiring Manager,

I am writing to express my interest in the **Java Developer** position at your esteemed organization. As a final-year B.Tech student in Computer Science and Engineering from MCKV Institute of Engineering with a strong academic record (CGPA: 8.81) and hands-on experience in backend and full-stack development, I am excited about the opportunity to contribute to your team.

Throughout my academic career, I have focused extensively on core Java, ObjectOriented Programming, Data Structures, and relational databases like MySQL. My final year project, **Department Management Web Application**, allowed me to design and build a full-stack platform where students and faculty could interact via dashboards, notes, and guidance modules. I handled both frontend and backend logic using HTML, JavaScript, Node.js, and Java-based backend integration.

I also completed a web development internship through **IBM SkillBuild and CSRBOX**, where I gained experience in building responsive web pages, deploying interactive features using JavaScript, and testing website functionality. These experiences have sharpened my technical skills and taught me the importance of writing clean, scalable code.

In addition to my technical capabilities, I bring strong problem-solving skills, adaptability, and a commitment to continuous learning. I'm particularly drawn to backend development roles where I can apply my Java expertise and deepen my understanding of scalable system design.

Thank you for considering my application. I would welcome the opportunity to further discuss how I can contribute to your development team. Please feel free to contact me at your convenience.

Sincerely,

**Mainak Maity**
